Rondo · Dividella

Innovative packaging solutions:
System packaging from a single source.

The 4 steps to a market-ready system solution:

1 Your product – our challenge

Packaging development – **2**
hand in hand

Rondo

Have you developed a new product which needs patient-friendly, functional packaging? Then Rondo and Dividella are the right people for you. Regardless of the type of product – liquid, paste or solid – we are your partners in the joint development of a solution tailored to your needs.

The creativity of the packaging development centers at Rondo and Dividella form the basis for your packaging solution. This is how our combined efforts produce highly functional solutions which can be produced efficiently on modular packaging machines. Depending on your requirements, the packs can be produced manually, semi-automatically or fully automatically. Joint development by Rondo and Dividella ensures that our products combine a high degree of functionality and maximum productivity.

Rondo und Dividella

The answer to complex customer requirements.

3 Expertise in packaging materials

Rondo are known as specialists in creative and innovative paperboard packaging solutions. Rondo are able to cover all the stages in the process of producing an optimal packaging solution. These include pack development, pre-print, print, embossing and stamping, gluing, code checking and quality assurance to GMP standards and DIN ISO 9001/2000.

4 Packaging machines and systems – innovative and efficient

Dividella's unique platform concept, based on a tried-and-tested modular system, allows customized automation solutions to be built. Mechanical packaging lines, which include process element such as carton forming, carton transport, item feed, item handling, pharmaceutical code and presence checks, insertion of patient information leaflets and the application of variable data, help ensure your projects are highly efficient.

Dividella

Pharma Packaging Technology

Dividella's specialty is the development and manufacture of machines for fully automatic packaging of ampoules, injection bottles, carpoules, complete syringes with integrated needles or a separate needle holder and other cylindrical items, as well as tablet blisters, patches, transdermals, plastic ampoule strips, combination packs and other products which are difficult to stack. Professional project management, along with a high level of expertise in validation and qualification enable complex projects involving entire lines to be handled efficiently.

The innovative automation professionals.

Dividella

Dividella's packaging lines are in use world-wide and are known for their problem-solving and customer-specific design features.

These are complemented by product characteristics such as operating safety, a high degree of reliability, user-friendliness, short conversion times and fast size changes.

Packaging systems with all the advantages of series production.

The system packs developed by Rondo-Dividella are erected on the packaging line from supplied

flat blanks, then filled and provided with a tamper-evident seal. Mono-material packs produced in this way...

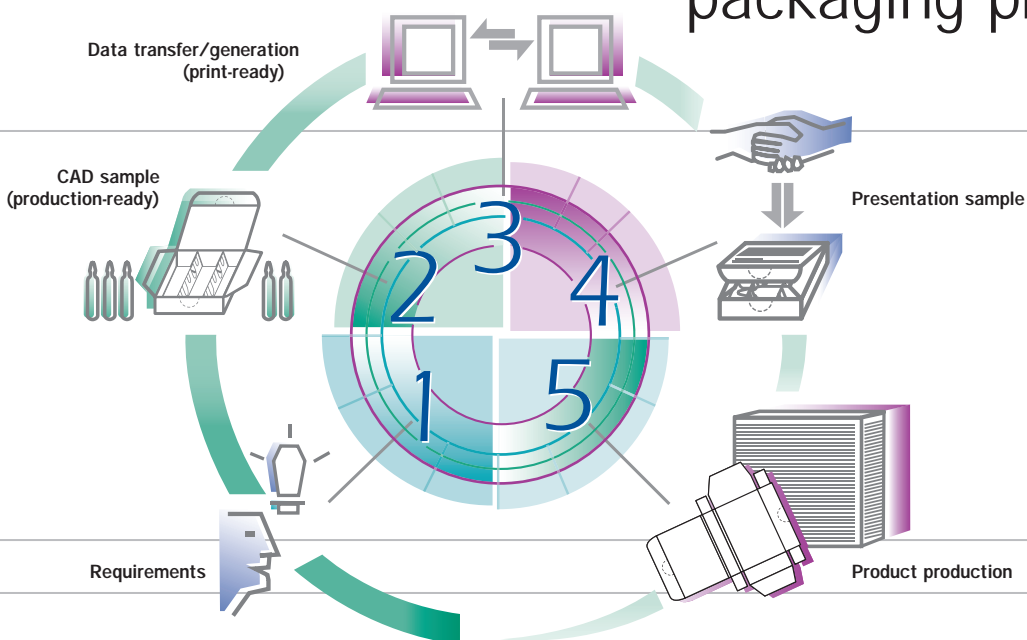

- provide optimal product protection
- save space
- are exceptionally user-friendly
- have a tamper-evident seal
- are a low-cost packaging solution
- feature low disposal costs
- are made from 100% paperboard
- offer extensive space for patient information.

Rondo

Printing and Packaging

Rondo have been involved in paperboard packaging to meet product and market demand for more than 70 years. As packaging professionals, using the very latest machinery, Rondo – in association with Dividella – develop comprehensive system solutions and complete packaging lines, above all for the pharma industry. A large body of customers proves that Rondo's excellent price/performance ratio, high quality and service enjoy an outstanding international reputation.

The creative and innovative packaging professionals.

Rondo

Rondo's product range includes:

- folding cartons
- folding cartons with crash-lock or patented bottoms
- displays and dispensers
- special finishes: hot-foil embossing, UV lacquer (full-area or spot finish)
- the Rondo flute
- blanks for Rondo/Dividella packaging systems
- In the small quantities centre, we produce lots quickly and at low cost.
- We produce very small quantities (> 1 No.) with no tooling costs, in good quality, at an attractive price and within a short time.
- Our networked data processing system means we are able to accept data from customers directly. This simplifies the processes for both parties.
